EDUCATION

Georgia Institute of Technology

Master of Science in Analytics (Computational Data Analytics Track)

Atlanta, Georgia

Aug 2025 – Dec 2026

- Coursework: Machine Learning, Deep Learning, Data and Visual Analytics, High Dimension Analytics, Operations Research

National Chengchi University

Bachelor of Arts in European Languages and Culture

Taipei, Taiwan

Sep 2015 – Jun 2020

SKILLS

Programming:

Python, SQL, R, JavaScript, PHP, MATLAB, HTML/CSS

Libraries & Frameworks:

PyTorch, TensorFlow, scikit-learn, XGBoost, LangGraph, RAG, OpenCV, FastAPI, React.js

Tools & Platforms:

AWS, Docker, Git, GitHub, Linux, PostgreSQL, MySQL, Tableau, Power BI, LaTeX

EXPERIENCE

ATDC - North Star AI Labs

AI Engineering Intern

Atlanta, Georgia

May 2026 – Present

- Engineered a local multi-agent deep research system (LangGraph, local LLM inference, SearxNG) in a hierarchical Orchestrator → Searcher → Analyzer architecture with tool-call quotas to prevent runaway execution.
- Built a full-stack journalist outreach platform (React, TypeScript, Express, PostgreSQL) featuring automated media discovery, profile enrichment, personalized pitch generation, and an NLP reply classifier.
- Developed RAG content generation pipeline, grounding drafts in live research to auto-publish approved content to web CMS.

OurScool Education Inc.

Data Scientist

Taichung, Taiwan

Jan 2023 – Jan 2024

- Designed personalized quiz recommendation system using collaborative filtering, securing NT\$1M government funding.
- Performed customer segmentation and churn prediction (scikit-learn, XGBoost), driving 12% engagement and 20% retention.
- Implemented NLP pipelines and A/B testing to guide product and UI decisions, increasing conversion rates by 15%.
- Developed ETL pipelines in Python/SQL and Tableau dashboards tracking engagement and churn for leadership.

OurScool Education Inc.

Software Engineer & Technical Product Manager

Taichung, Taiwan

Jan 2022 – Jan 2023

- Built data-centric ERP system (React.js, MySQL, PHP) automating inventory workflows, cutting processing time by 30%.
- Designed RESTful APIs/databases for real-time model inference and CI/CD pipelines (AWS/Docker) reducing errors by 12%.

Walnuttek Inc.

Junior Software Engineer

Taipei, Taiwan

Jun 2021 – Dec 2021

- Implemented computer vision models (OpenCV, YOLO) for ultrasound breast cancer classification and lesion localization.
- Built end-to-end ML pipelines using Python and scikit-learn for risk prediction, churn modeling, and performance forecasting across healthcare, insurance, manufacturing and education domains.
- Built NLP pipelines using NLTK, web scraping, and text classification to analyze student sentiment and enrollment trends across social media and education forums, informing recruitment strategy.

RESEARCH EXPERIENCE

Emory University School of Medicine (Madabhushi Lab, Dept. of Radiology)

Agentic AI Research Intern

Atlanta, Georgia

July 2026 – Present

- Researching multimodal AI architectures aligning heterogeneous biomedical data (whole-slide images, MRI/CT, clinical records) into patient representations.
- Investigating cross-modal representations (CLIP, Gemini Embedding) to condition agentic hypothesis generation in SAGE (Structured Agentic system for hypothesis Generation and Evaluation) for clinical reasoning.

PROJECTS

OmniRetail ([GitHub Repo](#))

An end-to-end AI campaign copilot utilizing LLM catalog enrichment, customer segmentation, predictive intent modeling, and brand-grounded ad generation. Engineered real-time inventory-aware recommendation algorithms and an evaluation dashboard using MobileNetV2, DeepFashion, DeepSeek LLM, XGBoost, RAG, FastAPI, and Streamlit.

Bird Migration × Light Pollution ([GitHub Repo](#))

Interactive network analysis modeling migratory stopovers and trajectory shifts against artificial light pollution. Built spatiotemporal feature pipelines and predictive species occurrence models integrating eBird citizen-science records and NOAA environmental covariates using PyTorch, XGBoost, GeoPandas, Streamlit, and Folium.
